Subject: RE: Eloy Staffing Issues

There is concern that we cannot provide the current level of service without compromising staff or the program. We must consider some short term options until staffed up; such as rescheduling of medication pass and screenings on days only. You cannot work with a 48% nursing staff. I want to provide the facts to ICE through the director in an effort to describe the situation we are in due to ICE management failures in some areas (clearance process delays).
